

Editor de diagramas Dia, disponible para descargar en: <http://dia-installer.de/>

The screenshot shows the Dia diagram editor interface. The main window displays an Entity-Relationship (ER) diagram with the following components: a rectangular frame containing a top 'Entidad' (Entity) box, a 'Relación' (Relationship) diamond, a bottom 'Entidad' (Entity) box, and an 'Atributo' (Attribute) oval connected to the bottom entity. The interface includes a menu bar (Archivo, Editar, Ver, Capas, Objetos, Seleccionado, Herramientas, Métodos de entrada, Ayuda), a toolbar with various drawing tools, and a left-hand palette. The palette has a dropdown menu set to 'ER' and contains icons for Entity (E), Relationship (R), and Attribute (A). A status bar at the bottom indicates 'Seleccionados «Standard - Box»'. Two callout boxes provide instructions: one points to the ER dropdown menu, and the other points to the diagram elements.

Elegir esta opción en "Otras hojas" para dibujar Diagramas E-R

Doble click sobre un objeto para ver y editar sus propiedades: etiqueta, estilo de línea o flecha, etc.
