

Summary

Introductory workshop to Cytoscape focused on the analysis and visualization of gene networks leveraging several third-party apps. The workshop will cover the installation of Cytoscape and several apps as well as hands-on examples. Gene networks will be provided for the different exercises.

Table of Contents

- Intro (lecture)
 - Quick intro to networks
 - Definition
 - Applications
 - Quick intro to Cytoscape
 - About Cytoscape
 - Architecture basics
 - Basic features
 - Apps (Plugins)
- Network Analysis Workflow (workshop)
 - Load network
 - Load attributes
 - Analyze
 - Filtering
 - Statistics (Network analyzer)
 - Degree distribution, centrality, etc
 - Apps
 - Visualize
 - Layouts
 - VizMapper
 - Publish
 - Export network image as PDF/PS/PNG/JPG
- Advance topics
 - App development
 - Cytoscape as a service

Software requirements

- Cytoscape 3.2.1
It is available at <http://www.cytoscape.org/download.php>
- JAVA 7 OR GREATER
It is available at <http://www.oracle.com/technetwork/java/javase/downloads/jre8-downloads-2133155.html>
- INTERNET ACCESS
It will be necessary to install Cytoscape's apps.
- Hardware requirements
Minimum 2GB of RAM.
